

Construction Update - 2/10/2022

PROJECT: Asphalt Street Rehabilitation - City Forces

START DATE: 2/21/2021

END DATE: TBD

STATUS: City of Beaumont Streets and Drainage Department will be performing asphalt road rehabilitation, including base stabilization and asphalt overlays, with efforts to complete one section of street per month. Street sections to be included will be approximately one block in length and selected based on overall condition and the overall Pavement Index Rating from the recent Citywide Pavement Analysis that was done. Streets will be selected that have low traffic volumes and low population density because these types of streets will typically not make the larger Street Rehabilitation selection. This asphalt rehabilitation will be in addition to the already in place and ongoing asphalt maintenance program that is performed Citywide through the Streets and Drainage Department.

STREET	FROM	TO	STATUS
ANGELINA STREET	13TH STREET	WEST END	Completed 08/2021
EMMETT AVENUE	PARK STREET	NECHES STREET	Completed 02/2021
